

INGENIX®

Electronic Data Interchange (EDI)

EDI processes make sense for providers and payers alike by eliminating postage and printing costs, minimizing errors, providing an audit trail, and speeding reimbursements.

Executive Overview

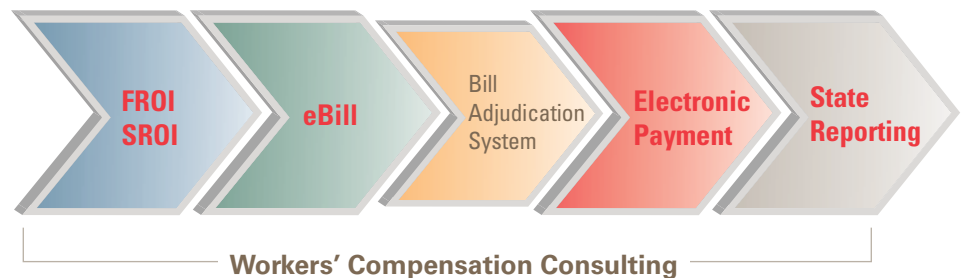

In addition to the states that now require EDI Compliance for first or subsequent reports of injury (FROI/SROI) and medical bill reporting, Texas, Minnesota and California workers' compensation commissions have created e-Billing mandates which will require medical providers and payers to send medical bills and other related documents electronically.

Other states are expected to quickly follow suit, adopting their own eBilling requirements based on national workers' compensation standards. This increasing regulatory pressure to transition from conventional paper-based bill and payment processing to standardized electronic transactions is spurring leading insurers and third-party administrators (TPAs) to evaluate technological solutions that provide compliance and improve operational efficiencies.

With our acquisition of Red Oak E-Commerce Solutions, Inc. (ROES), Ingenix now offers an end-to-end EDI solution. This complete EDI solution is designed to provide direct connectivity and integrated bill editing to health care providers, payers, and state workers' compensation program administrators, helping them streamline operational efficiencies with confidence while controlling administrative expenses.

Benefit Summary

- Reduce cycle times
- Reduce costs
- Improve workflow and claims efficiencies
- Increase accuracy for state compliance

Solutions ↙

All state EDI reporting requirements can be met with Ingenix offerings—individually, or through a single connection point.

FROI/SROI

Ingenix WorkComp.NET edits state mandated reports to ensure all required data is provided, accurate, and consistent before transmitting. It allows Internet-based reporting of FROI/SROI and medical bills to help lower claims reporting costs, increase claim accuracy, reduce manual processing and data entry, and maintain compliance with state EDI reporting requirements.

eBilling, Clearinghouse, and Delivery

Ingenix eBilling enables the exchange of critical financial and clinical billing data in real-time. Data can be transmitted either directly or in batches, through secure transaction gateways and portals. Our tools seamlessly process and index electronic attachments from multiple practice management and document management solutions.

Electronic Provider Payment

OptumHealthSM Electronic Payments and Statements are part of a complete remittance and reimbursement solution which eliminates costly manual and paper-based processes. Both print and electronic transactions can be managed from a single data file, providing efficient support for today's paper-based providers while seamlessly migrating to more efficient electronic processing.

State Reporting

Ingenix offers a range of products and services to meet your medical state reporting compliance needs. Our seamless bill editing, adjudication, and reporting process facilitates accurate data, reported in the correct regulatory format, to help you remain compliant with multiple state-required data elements and formats.

Consulting

Ingenix Property & Casualty consulting services provide the expertise and solutions needed for employers, carriers, third-party administrators, managed care organizations and state agencies to implement EDI strategies, measure administrative and claim management savings, improve operational efficiencies, better manage medical costs, and enhance return-to-work programs.
