

INGENIX[®]

Property & Casualty Solutions

On average, Ingenix Medical Bill Review clients see a 45.7 percent reduction of their bill review charges.

Mission

Apply a full suite of robust data, sophisticated methodologies, solid tools, and technical consulting expertise to help employers and insurers reduce total claim costs and eliminate redundancies and administrative inefficiencies.

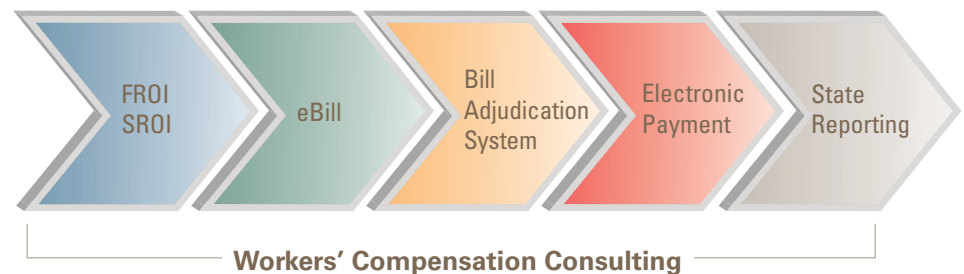

Overview

The Property & Casualty market is facing increasing health care costs, tighter operational budgets, an increasingly stringent regulatory environment, and oversight of premium rate setting.

Ingenix provides a comprehensive, yet customizable solution. Leverage the full suite or any combination of solutions to meet your specific business needs. Whether you want to reduce medical and administrative costs, improve workflow efficiencies, or decrease productivity losses, our flexible, end-to-end Property & Casualty solution can help you achieve your goals.

Solutions

Our advanced technologies and consulting services seamlessly accept, process, and adjudicate complex medical bills in a timely manner to help boost compliance.

FROI/SROI and Medical Bill State Reporting

Ingenix will edit incoming electronic medical bills to check that all required data is provided, accurate, and consistent. We utilize our WorkComp.NET application which allows Internet-based reporting of FROI/SROI (First or Subsequent Reports of Injury), and medical bills to help you lower claims reporting costs, increase claim accuracy, reduce manual processing and data entry, and maintain compliance with state EDI reporting requirements.

eBilling, Clearinghouse, and Delivery

Our comprehensive eBilling solution enables the exchange of critical financial and clinical data in real-time, directly and in batches, through secure transaction gateways and portals. Our tools seamlessly process and index electronic attachments from multiple practice management and document management solutions.

Bill Adjudication System (PPO Networks, Fraud and Abuse Detection, Prescription Profiling)

We offer a full suite of solutions including Ingenix Medical Bill Review (IMBR), PPO networks and services, fraud and abuse detection, and prescription profiling to help you reduce the cost of workers' compensation and auto liability claims through connectivity and automated medical bill review and administration.

Electronic Provider Payment

OptumHealthSM Financial Services Electronic Payment and Statements are included in a complete remittance and reimbursement solution that eliminates costly manual and paper-based processes. Both print and electronic transactions can be managed from a single data file, providing efficient support for today's paper-based providers while seamlessly migrating to more efficient electronic processing.

State Reporting

We offer a full range of products and services to meet your EDI, eCommerce, and state reporting compliance needs. Our seamless bill editing, adjudication, and reporting process facilitates accurate data, reported in the correct format, to help you remain compliant with multiple state-required medical data fields and formats.

Consulting

Ingenix workers' compensation consulting group provides the expertise and solutions for employers, carriers, third-party administrators, and managed care organizations. With our support, our clients can better measure administrative and claim management savings, improve operational efficiencies, better manage medical costs, and enhance return-to-work programs.
