

INGENIX®

Provider360™ NPI Integrator

Benefits

- Easily bring your provider data into compliance with integrated NPI numbers
- Eliminate time-consuming manual look-up and error-prone data entry of NPI numbers
- Save your IT department the complex and time-consuming job of trying to integrate the NPPES data without proper crosswalks
- Integrate NPI data easily by utilizing the many legacy identifier crosswalks available in the Provider360 database

We've solved your NPI integration puzzle.

We know that shifting to NPI can be a huge challenge. Integrating the NPPES data can be difficult. Manual look-up and entry of thousands of NPI numbers is costly and error-prone. And, the NPI deadline has passed. Many organizations like yours have started their NPI implementation only to find it more challenging than expected.

Regardless of where you are in implementing NPI, Ingenix Provider360 NPI Integrator services will help you complete the process by validating, augmenting and completing your NPI data – quickly, easily, cost effectively and accurately.

We've done the work for you. Within the Ingenix Provider360 database, we've integrated the NPPES data. We've cleaned it and matched it to your providers for you. We've aligned the NPI numbers with other referential data to facilitate crosswalks using many conventional legacy identifiers. And, we make it easy for you to integrate this data back into your systems.

Delivered to you however you choose.

To make it easy for you to complete your NPI implementation, our Provider360 NPI data can be accessed several ways:

- **NPI Extracts** — You tell us what providers you want and what crosswalk data elements you need; we provide the extracted file including NPI and crosswalk data – in the file format you can most easily integrate back to your database.
- **NPI Data Enhancement Services** – You give us key elements from your provider data file; we'll compare and correct any NPI numbers you already have, fill in missing NPI and taxonomy data, and return your updated file to you. And, we can clean, standardize, augment and correct other data at the same time, if you desire.

Key Features ↙

- Provider360 NPI Integrator data elements include:
 - Provider name and provider degree
 - Provider NPI and NPI taxonomy
 - Variety of crosswalk data options
- Data delivered for only those providers you need or want
 - National lists, regional lists or just those providers you identify
 - Physicians, dentists, and allied professionals available
- Other data elements available on request
- Variety of input and output file formats
